LINK ELECTRONICS, INC.

REMOTE CONTROL FOR PRC-970
MODEL PSR-970

MADE IN THE USA

FEATURES
◆ **Major Setup Conrols**
◆ **Remote Control**
◆ **1 RU**
◆ **No Power Required**

The LINK PSR-970 Remote Control panel is designed to complement the LINK PRC-970 Processing Amplifier. The remote control panel receives its necessary power from the PRC-970 via a 15-pin sub-D connector. The familiar Proc Amp controls; Video Level, Chroma Level, White Clip, and Pedestal Level are available on the PSR-970 front panel. In addition; Black Clip, Sync Amplitude, and Color Burst Amplitude are recessed controls for operator set-up.

All adjustments are DC controlled, allowing the remote to be placed up to 250 feet away from its companion unit. A unique feature of the PSR-970 allows the user to select which controls will be active on the remote control panel by using the PRC-970's Manual/Preset switches.

The PSR-970 is housed in a sturdy 1RU chassis and backed by LINK'S standard 10-year warranty.
